DETAILED ACTION

Allowable Subject Matter

Claims 6-10,12-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5,11,15 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art (APA) in view of Chu. APA is the apparatus discussed in the specification on page 1. This includes the basic paper shredder not having a switch lock which could cause operator injury. Chu solves this problem by disclosing similar apparatus (a power tool) having a switch lock. In order to prevent operator injury, it would have been obvious for one of ordinary skill in the art to modify APA by providing a switch lock, taught to be desirable by Chu. Note that the use of visual indicators to detect operating conditions is well known in the art and of no patentable merit.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over APA in view of Chu as applied to claim 1 above, and further in view of Schwelling '444. It is not clear from the specification if APA includes a cover for safety purposes. Schwelling '444 solves this problem by disclosing similar apparatus including the use of a cover. In

order to prevent operator injury, it would have been obvious for one of ordinary skill in the art to modify APA by providing a cover, taught to be desirable by Schwelling '444.
